 - 1. An overview of code (Flow Chart)
 - 2. Functions Involved

1 - guiforms relation

There are four different forms namely **form1; form2; form3; form4** .

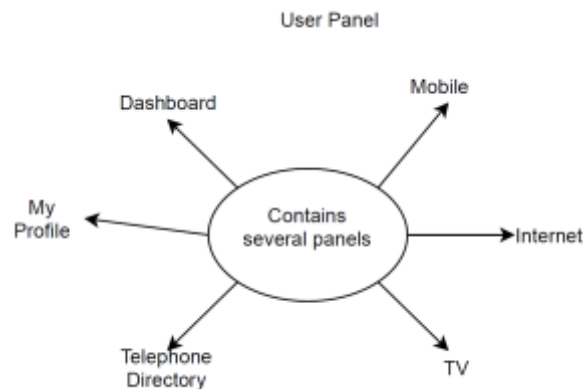

Login page (**form1**) contains the **signup** and **login** facilities . If already there exist an account user can simply login with his username and password. In the case of new user's they can sign up by providing the details shown in the form(**form1**).

After logging in if it is user account he visualises the **user panel** with dashboard showing users wallet balance , recharge option and the present status of current tv, internet and mobile plans . The user panel also contains other options namely **mobile , internet , tv , dashboard and myprofile** which are briefly described later .

If the logged in user is **admin** then he visualise **form4** which contains mobile , internet , tv , request , view users , ads user options . In **Mobile** the admin can view the information of current plans and he can update the new plans if available and the latest offers In **TV** the admin can view the information of current tv plans and he can update the new plans if available and the latest offers . In the **Requests** he can view all the requests from users to update the wallet details and can update their respective wallets . In **View Users** the admin can see the total number of users and their respective details where he can also search them with their mobile number or aadhar number .

In ADD User the admin can add the new users who have signed up recently

form4 / Notifications form where the users can view their notifications .

2 - User pannel flow chart

Brief note on User panel :

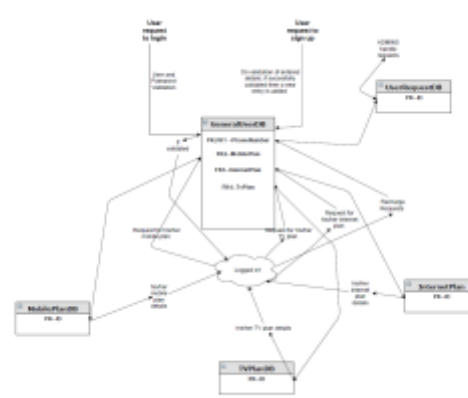

The User panel is viewed when a user login to his account which also contains many other facilities like Mobile , TV , Internet , Dashboard , Telephone Directory , My Profile

Dashboard : It shows users wallet balance and an option for wallet recharge .

Mobile : It shows the users current plan details and its validity details and the list of current recharge plans available and a panel to transfer the money to other users .

TV : It shows the users current plan details and its validity details and the list of current recharge plans available .

My Profile : It visualises the information related to the user (Name , Date of Birth , Mobile number and user name). The user can also edit his profile .
